Sarens Supports Construction Of New Gas Storage Terminal On Tahiti

Sarens' wide-ranging equipment and deep engineering expertise are vital to clients across the globe, from our homebase in Belgium to distant waters on the other side of the world. Most recently, we were on the island of Tahiti, in French Polynesia, where Mana Ito S.A. is spearheading a new gas terminal project.

Successful Heavy Lifts Performed At Tereos Starch & Sweeteners Europe Facility

In a remarkable feat of engineering and coordination, Sarens lifted an evaporator and separator along with several smaller pieces necessary for the facility's operations at the Tereos Starch & Sweeteners Europe facility in Aalst, Belgium. The lifts were completed within a tight timeframe and challenging conditions. The project, which involved maneuvering heavy equipment in a small area in the center of the city, required meticulous planning and execution.

Sarens Assists in The Expansion of The Cockburn Cement Plant in Australia.

The expansion of the Cockburn Cement plant in Kwinana aims to reduce CO2 emissions by 20% through the installation of cutting-edge cement production technologies. Sarens played a crucial role in this project by performing heavy lifting operations for the installation of two large filtration units and two highly engineered covers for the ball mill building.

Sarens Precision-lifts 750m Long Pipeline

In anticipation of increasing demand for raw water in the future, Evides Water Company called on Visser & Smit Hanab to upgrade and extend segments of the current raw water conveyance network, stretching from the reservoirs in the Biesbosch region to Zeeland. Situated in Roosendaal, North Brabant, a 750m long pipeline had to be drilled. The pipeline's path traversed beneath the railway track, necessitating meticulous planning and flawless execution to ensure success. Sarens was tasked by our client Visser & Smit Hanab to assist in the drilling of a 750-meter-long pipe beneath a railway track using a 450-tonne drilling rig.
