## Sarens' Custom-Built Engineering Solutions put Finishing Touches on Thames Tideway Tunnel in UK

Sarens has expertly lifted the final lid into place for the Thames Tideway Tunnel, London's new "super sewer" designed to divert vast amounts of storm sewage from the River Thames. When it is fully operational in 2025, the 25 kilometre-long tunnel will almost completely stem the flow of the tens of millions of tonnes of storm sewage that spill into the river each year.

## Sarens Supporting Maintenance Campaign for Hywind Scotland, the World's First Floating Wind Farm

Sarens was tasked by the Port of Wergeland in Norway to replace the bearings in the five floating wind turbines by the end of September 2024. Once the replacements are completed, all units will be reconnected to the Hywind Scotland site.

## Spotlight: Sarens in Tanzania

Since June 2021, Sarens has been making significant strides in Tanzania, marking its presence with the inauguration of facilities in the country in January 2022. Initially testing the waters, the company swiftly transitioned to becoming a key player in the region's industrial landscape, offering a wide array of services tailored to meet the diverse needs of the local market.
