Short Timeframes, Narrow Waterways: How Sarens Installed a Unique Bridge in France

Every bridge installation Sarens performs is unique, and with decades of expertise in this sector, we know that there will always be fresh challenges to solve. No matter the constraints, our job is to find the solution. So when client MAEG Costruzioni SpA contacted us about installing a steel cyclist and pedestrian walkway in Albi, France, Sarens took on the challenge. Our mission: install nine large bridge sections along the historic 19th-century railway viaduct on the Tarn river.

Sarens Supports the Expansion of Talimarjan Thermal Power Plant in Uzbekistan

Sarens is proudly collaborating with client Callik Enerji on an important plant expansion project in the Kashkadarya region of Uzbekistan. The Talimarjan Combined Cycle Power Plant is undergoing expansion and upgrade work to increase its power supply, with two more combined cycle plants being added to achieve a total capacity of at least 900 MW. As part of this work, Sarens will be lifting several heat recovery steam generators (HRSGs) and other modules weighing up to 258 tonnes and measuring up to 125 metres.

Sarens Completes Assembly of Two Harbour Cranes in Genk, Belgium

Sarens successfully completed the assembly of two barge cranes at the Port of Limburg in Genk, Belgium. The project was part of the redevelopment of a former Ford manufacturing site and is expected to boost the local economy while creating new jobs in the region. Commissioned by Künz for LDM, the work highlights Sarens' role in providing crucial infrastructure to support industrial growth.
