MATERIAL HANDLING EQUIPMENT TYPES

• FORKLIFTS

- Powerful forklifts for handling loads in warehouses, ports, and industrial sites
- Available in various capacities with electric, diesel, or LPG power options
- Ability to automate lifts and shifts for 24/7 autonomous operation, eliminating the need for manual supervision

• AERIAL WORK PLATFORMS

- Safe and efficient aerial lifts for working at heights
- Ideal for maintenance, construction, and installations in hard-to-reach areas

• REACH STACKERS

- Essential for container handling in ports and storage facilities
- High lifting and stacking capacity combined with maximum flexibility

• TELEHANDLERS

- Versatile telehandlers that combine strength and precision
- Suitable for construction, agriculture, and logistics, with various attachments for specific applications

• POWER SWEEPERS

- Robust sweepers for keeping worksites, warehouses, and production facilities clean
- Efficient in removing dust, debris, and waste

• EARTH MOVING EQUIPMENT

- Earth moving machines such as excavators, bulldozers, and wheel loaders for heavy infrastructure and construction projects
- Essential for moving and processing soil and materials
